

# TITAN

A range of elegant technical luminaires designed to resist extreme vandalism in public areas.

More light and less maintenance: Titan is the long-term lighting solution that will reassure both local authorities and users of public areas!

**NEW!**

EXISTING  
INSTALLATIONS:

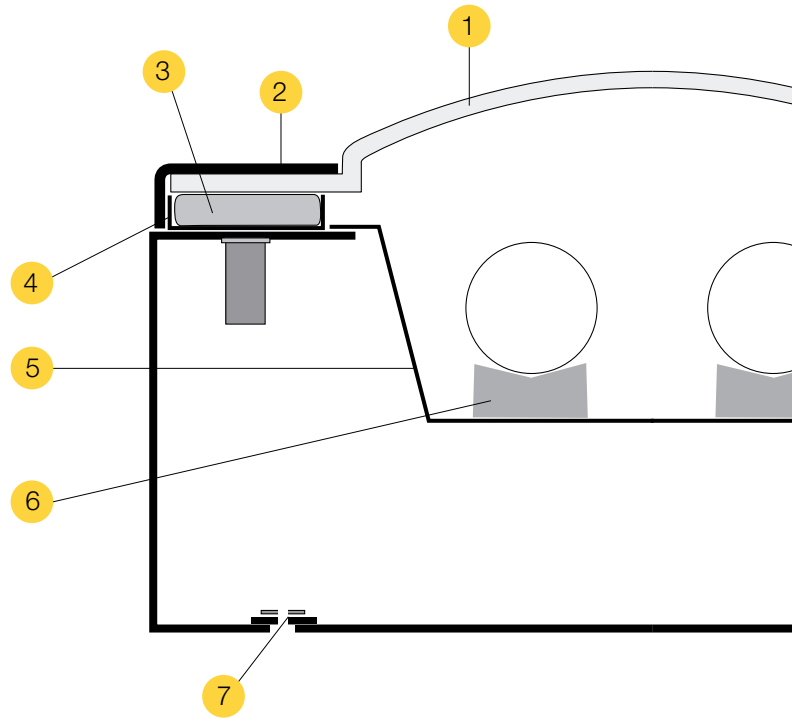

Switch to LED!  
see p. 202-203

## Retrofit LED gear

Existing Titan light fittings can also benefit from LED technology: Simply disconnect the existing fluorescent gear tray and replace it with the appropriate LED gear tray.

And there you go!

- 1 Braced polycarbonate diffuser
- 2 Anti-corrosion steel frame, 2 mm thick
- 3 Gasket compression chamber
- 4 Anti break-in angle profile
- 5 Sliding and removable gear tray
- 6 Anti-vibration buffers
- 7 Sealing washers supplied

### More light

LED modules up to 10,000 lumens, fluorescence T5 and T8 up to 80W.

### More savings

Thanks to LED equipment and light management systems: motion detection, dimming, etc.

### More resistance

Up to 120 joules. Thanks to the steel body, the braced diffuser and the anti-vibration buffers under the lamps.

### More life time

With power LED and professional power supplies designed to last 50000 hours or a minimum of 10 years (10 hours a day).
