POOLS • FOUNTAINS LIGHTING

**Quality is
the best investment
over time.**

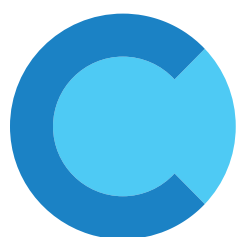

GILBERTO CASON

Founder and CEO of Teclumen Ltd.

Teclumen started in 1978 as a company specialising in the assembly of theatre lighting. With the passing of time and experience gained in the lighting sector the company was encouraged to create its own trademark and to offer a line of theatre products made in Italy and branded Teclumen. In 2003 the new head office and production plant was opened, concentrating into a single building the facilities for design, assembly, sales and after sales service. Today the company's production can satisfy the demands of various sectors such as: lighting for theatres, architecture, gardens, stages and shows, indoors, swimming pools and fountains.

In order to guarantee high quality, Teclumen carries out the main production stages in-house using the best in 3D design technology. Rapid flexible production is possible thanks to the highly technological machines (laser cutting) used. As regards the choice of components, Teclumen counts on reliable partners that are internationally acclaimed leaders; the final assembly, entirely inhouse, makes it possible to achieve high quality. Teclumen has a well-organised, functional and well-stocked warehouse of products. These aspects facilitate prompt delivery all over the world.

MADE IN  SINCE
ITALY 1978

PER AQUAM
POOLS • FOUNTAINS LIGHTING

THE MOST BEAUTIFUL EMOTIONS ARE EXPERIENCED IN WATER.

Per Aquam is our division dedicated to crafting emotions within the pool. Submersible lighting is our passion. That's why, for years, we have been at the forefront of designing and producing lights that are meant to remain in contact with water for an extended period and capable of creating highly impactful lighting effects.

Today, we create various ranges of lights with different sizes and features, all aimed at making every corner of the pool truly magical.

BEAUTY DESERVES TO BE ILLUMINATED TO PERFECTION.

We began experimenting with LED technology in the early 2000s. This experience, gained through the development of our other business divisions as well, allows us today to create products capable of generating any type of atmosphere with light, producing highly technological lamps that are incredibly weather-resistant and resistant to the erosive effects of water.

The **know-how** derived from our experience in the entertainment industry has contributed to the growth of our expertise in underwater lighting design. This makes us the ideal partners not only in product supply but also in the realization of full-fledged lighting projects that maximize the features and potential of our lamps, taking into consideration the specific structures they need to operate in.

**OUR PROJECTS ARE BORN TO
EMOTIONALLY MOVE THROUGH LIGHT.**

ALL THE REASONS TO CHOOSE TECLUMEN POOL LIGHTS.

STEEL BODY FOR LONG-LASTING DURABILITY.

Teclumen pool lights are constructed from AISI 316L stainless steel, ensuring greater longevity and improved heat dissipation.

GLASS FOR BETTER LIGHT DISTRIBUTION.

Unlike plastic materials, our glass cover remains transparent with regular cleaning, ensuring that light is not diffused or dampened, allowing the luminous beam to shine at its best.

MECHANICAL SEAL. SIMPLER, FASTER, SAFER.

Teclumen lamps feature a mechanical seal that eliminates the need for silicone, resulting in faster product delivery times. Moreover, any necessary repairs can be easily performed in a short time.

ANTI-OXIDATION TREATMENTS.

Special treatments are applied to all our products to prevent oxidation in water.

NO MORE SHADOW CONES.

Thanks to our special filter that widens the light beam from 120 to 180 degrees, light is evenly distributed across the entire pool surface, creating a diffuse lighting effect without shadow cones.

A blue circle containing the white text "PLC".

WAVE-CONDUCTED TECHNOLOGY.

Wave-conducted technology allows for control signal transmission to the lamps through the power cable. This simplifies installation as a 2-wire cable can be used, even for color-changing lamps. This type of system eliminates the need for external drivers and multipolar cables. One of the advantages of this technology is the easy replacement of traditional lamps in existing pools.

EVEN THE CABLE MATTERS.

All Teclumen products come with a special immersion-resistant cable that ensures long-lasting durability without deterioration.

A blue circle containing the white text "RGBW".

RGBW TECHNOLOGY. THEATRICAL WATER ATMOSPHERES.

Thanks to this technology, it's possible to achieve different shades of white and captivating color nuances quickly and easily, creating the ideal pool atmosphere for any occasion.

TEMPERATURE CONTROL.

Teclumen underwater lights include a special temperature control protection system. Unusual temperature increases activate the system to safeguard the electronics and LEDs.

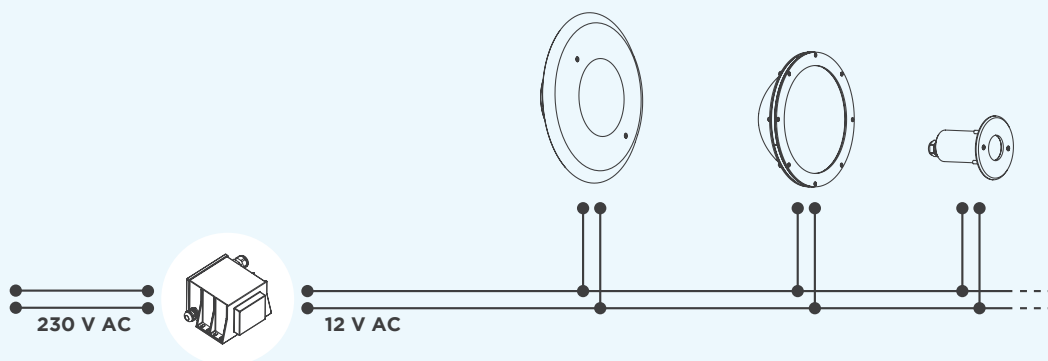

THE TECHNOLOGIES INSIDE OUR LIGHTS.

12 V AC - FIX

The technology of LED lamps with two-wire cable and fixed white (W) color.
The ideal solution for replacing traditional halogen lamps.

FIX

12V AC - PLC

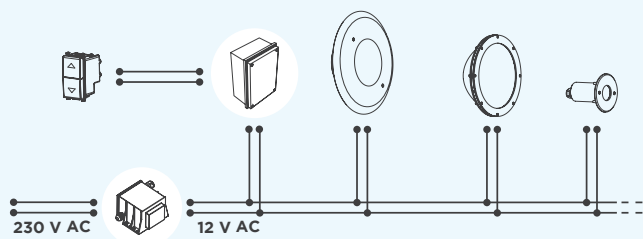

POWER LINE COMMUNICATION TECHNOLOGY.

THE SIMPLE SYSTEM WITHOUT EXTERNAL DRIVERS AND POWER SUPPLIES.

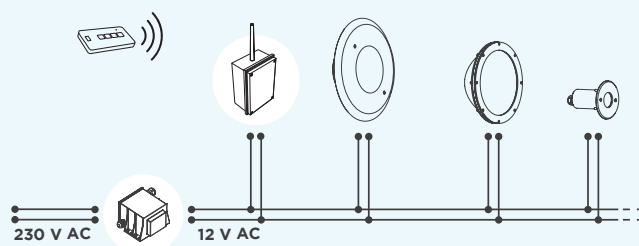

The technology of RGBW color-changing LED lamps with a 2-wire cable compatible with existing systems. These lamps are controlled by a wave-conducted system, using either a remote control or external buttons, allowing you to set 13 fixed colors and 10 automatic sequences. This is the ideal solution for both new installations, as you only need to prepare a two-conductor cable to power the lamps, and for existing installations, as there is no need to change the cables.

PLC

**PLC with buttons
wiring diagram**

**PLC with remote control
wiring diagram**

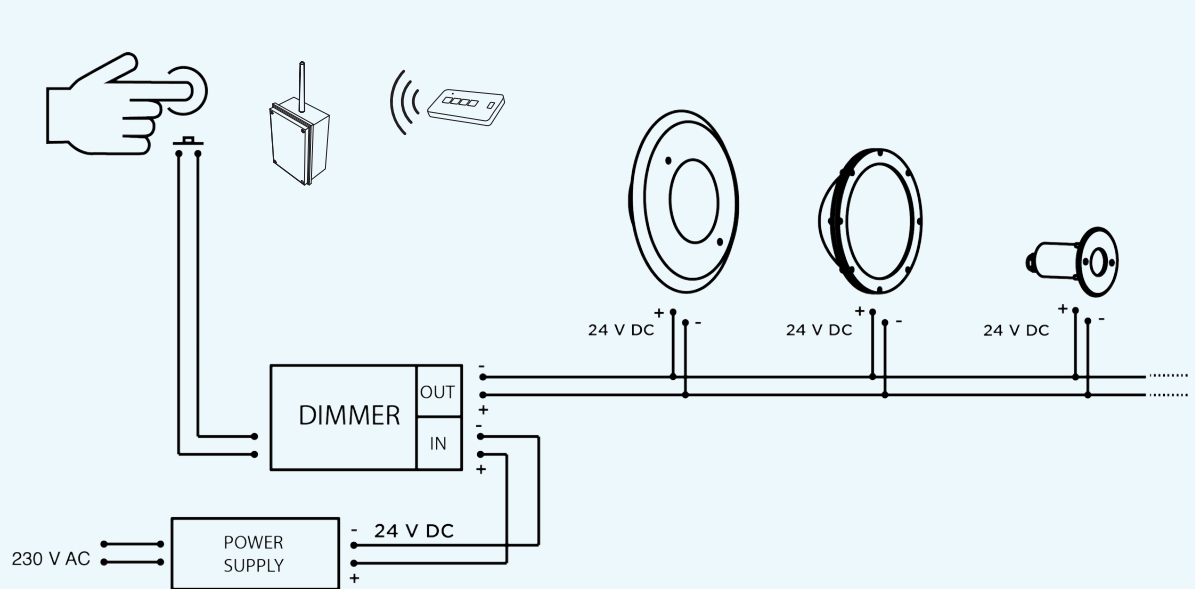

INTEGRATION WITH DMX AND DALI.

In recent years, home and hospitality automation systems for managing electrical devices have become increasingly common. By using wave-conducted technology, integration with DMX and DALI systems is possible. For this purpose, there are two converters that enable lamp control directly from the pool's home automation system.

24 V DC - DIM

The technology of LED lamps with two-wire cable and dimmable white color. The ideal solution for dynamic and controlled lamps with 24V dimmer and push button or remote control.

PERLA

The Lamp that transforms the pool.

Perla is the line of underwater lamps made of stainless steel and glass designed to create emotions in the pool. A series of products capable of crafting luminous scenes and enhancing shapes and materials in every corner of the pool.

High performance combined with compact dimensions ensure uniform lighting without shadow cones, both in white and colored light. Perla, with its clean and elegant shapes, is a jewel that embellishes the pool and is a powerful light source with extremely compact dimensions. The perfect solution for achieving quality light with the best design.

Perla is available in various versions and sizes: With fixed co or technology FIX, RGBW OC, and RGBW DMX to suit project requirements.

MAGIC

The Lamp with smart installation.

Magic is the high-performance lamp line with truly simple and fast installation. Thanks to LED technology, Magic products are capable of illuminating the pool ideally without complex mounting, as they can be installed on return inlets or small round niches.

MAGICLINEA

The lamp that offers all the elegance of rectangular shapes with a small round niche. A captivating blade of light that enhances the pool without the need for a bulky rectangular niche. Thanks to its alignment mechanism, it can be adjusted horizontally even after installation, ensuring all the necessary micro-adjustments for precise installation.

MAGICSUB

The lamp that guarantees perfect lighting even in small spaces. Its smart nature allows for two different types of installation: inside a return inlet body or in a niche containing the necessary cable for on-deck maintenance.

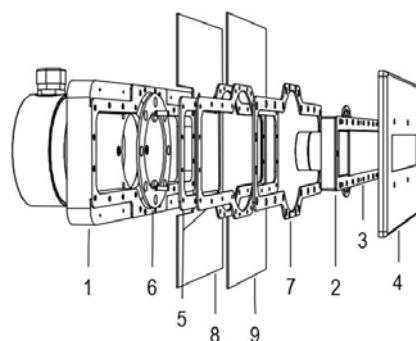

LINEA

NICHE AND INOX FLANGE

LED lamp designed to best illuminate medium-sized pools. The included recess contains the necessary cable for poolside maintenance.
Pool type: panel / concrete / with tiles or sheet.

CLASSIC

Maximum Elegance for Stylish and Efficient Lighting.

Teclumen has created a product line designed to replace the classic but outdated incandescent PAR56 lamps. A range of high-performance lamps with LED technology that enhances luminous output and reduces energy consumption without the need for any intervention on the pool's structure, utilizing the existing niches.

PAR 56 WITH LED TECHNOLOGY

The classic standard for pool lights reimaged with the latest-generation technology. Ideal for relamping projects and new installations.

MINI

The LED technology lamp designed to replace traditional 100W halogen lamps in a simple and fast manner without the need for any structural modifications to the pool.

PAR56^{power}

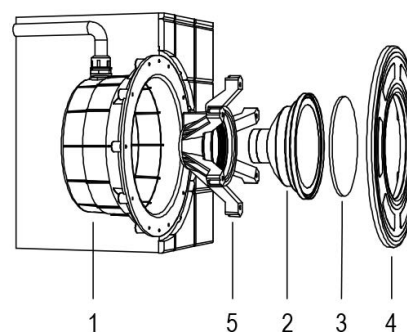

EX 300W REPLACEMENT

LED lamp designed to best illuminate large pools. The standard PAR 56 size allows installation as a replacement for conventional 300 W halogen lamps.

Pool type: panel / reinforced concrete / with tiles or sheet.

 12 V AC CL III IP IP68

The diagram shows an exploded view of a pump assembly. Component 1 is the main pump body with a flange. Component 2 is a conical diffuser. Component 3 is a thin circular gasket. Component 4 is a circular end plate or cover. Component 5 is a central shaft or impeller assembly. The components are arranged in a linear sequence from left to right, indicating their assembly order.

Technical drawing of the LED lighting fixture showing front, side, and detail views with dimensions:

- Front View (Left):** Shows the overall height of 310 mm and a mounting bracket width of 140 mm.
- Side View (Middle):** Shows the depth of 100 mm and the mounting bracket width of 98 mm.
- Detail View (Right):** Shows the mounting bracket with a width of 56 mm and a height of 175 mm.
- Top View (Bottom):** Shows the circular light output with a diameter of 170 mm.
- Bottom View (Far Right):** Shows the cable entry with a diameter of 10,5 ± 0,4 mm and a cable cross-section of 2x2,5 mm².

Accessories

The right accessory in a system can make the difference in terms of aesthetic and functional aspects.

A wide range of accessories selected with care complete the supply of material for installation in lamps in swimming pools and fountains.

SPECIAL CABLES

Special cables for electrical connection of lamps. You can order lamps by requesting the length of the installed cable with sizes of 4 m (standard), 8 m, 12 m, 16 m and 20 m. To find out the maximum allowed length according to the lamp model, so that there is no voltage drop, see the product page.

ALONG WITH OUR LIGHTS, WE PROVIDE YOU WITH ALL OUR EXPERIENCE.

CUSTOMIZATION OF PRODUCTS.

We offer personalized sizes and designs to meet specific requirements.

36-MONTH WARRANTY.

All our products are covered by a 36-month warranty, ensuring their quality and durability.

TRACEABILITY.

Each product is assigned a unique serial number for easy identification. In case of replacement or addition, Teclumen guarantees that the new products will have the same technical characteristics.

FAST DELIVERY TIMES.

Thanks to our well-stocked warehouse, we can ensure quick delivery of our products.

SERVICE ABOVE ALL. EVEN AFTER THE SALE.

PRE-SALES SERVICES:

ILLUMINATION AND ELECTRICAL DESIGN SUPPORT.

Thanks to our design department, Teclumen provides customers with DIALux projects with renderings that allow them to immediately visualize the final installation result. This also provides installers with a tool to enhance their commercial offerings.

Our company can support customers during the electrical system design phase, providing precise calculations and guidance regarding cable sizing, junction box positions, and electrical panels.

OUR SUPPORT ALWAYS AVAILABLE.

Our representative and office are at the service of customers, providing clarifications and guidance on technical and commercial support during the purchase process.

POST-SALES SERVICES:

TOTAL AVAILABILITY.

A commercial representative is always available to assist with any type of request and provide information.

QR CODE.

All Teclumen product boxes are equipped with a QR code that allows users to access the product's technical specifications at any time.

This way, the most important installation information is readily available without having to contact customer support.

GENERAL CONDITIONS OF SALE

ART. 1 GENERAL

These conditions of sale, which supersede and replace previous conditions, are applicable to all the orders processed and are understood as accepted in their entirety by the buyer on verbal or written order confirmation. Collection of the goods constitutes an implicit order confirmation.

ART. 2 PRODUCTS

The products are shown in the relevant catalogues and price lists. Small changes in the production and presentation of the product, which do not change the features of the product's use, may be made by our Company without notice and may not be presented as grounds for cancellation of the order by the buyer.

ART. 3 PRICES

Orders less than € 300.00 (understood as net goods) will not be accepted. All the prices in our price lists are "Franco Casaloldo (MN) Italia", VAT excluded. Discounts: are applied in proportion to the quantities ordered annually and by each order.

ART. 4 PACKING

For standard packing a cost of 2% of the value of the goods will be charged.

ART. 5 SHIPPING

If the means of transport is not explicitly stated by the customer, the shipment will be sent by the method we consider most suitable and the buyer may not refuse payment of the shipping costs. Goods travel at the customer's risk and liability even if shipped carriage free. Insurance will be provided only at the specific request and cost of the buyer.

ART. 6 DELIVERIES

The delivery terms are not binding but only approximate. The buyer will release the seller from all and any liability for damages resulting from delays in delivering the goods. Delay in the delivery of special pieces specifically produced cannot be construed as grounds for cancellation of the order.

ART. 7 WARRANTY

Our products are covered by a warranty against defects in material or workmanship for which we are responsible, for a period of 36 months from the delivery date. The warranty lapses if:

- a) the product has been used in conditions not indicated by us;
- b) the goods have been modified or tampered with by persons not authorised by our Company.

The warranty covers only the repair or replacement of defective products with the absolute exclusion of any liability arising from damage caused by the use of our products.

N.B.: In the event of repair or replacement at our plant the goods will be shipped at the customer's cost.

ART. 8 COMPLAINTS

Any complaints must be made within 8 days of delivery of the goods.

ART. 9 RETURNS

Every return must be authorised beforehand by the sales department that made the sale, by filling out the relevant RMA form. An identity number will be assigned which must be attached to the goods when they are returned. Goods returned without an identity number will not be accepted. All returns must be shipped carriage free.

ART. 10 PAYMENTS

Payments must be made to Teclumen s.r.l. Discounts and rounding are not accepted and only the cost incurred will be charged back in the invoice. This amount is VAT exempt pursuant to art. 15/3 of Italian Presidential Decree 633/72. Any late payments will be subject to interest at 1.5% per month in addition to bank charges and any legal fees.

ART. 11 RETENTION CLAUSE

The goods remain the property of the seller Teclumen s.r.l. Until complete payment for the same in addition to the sums due for shipment, insurance, etc.

ART. 12 WITHDRAWAL FROM THE CONTRACT

If the customer cancels the order entirely or partially for any reason, a payment of 20% will be required.

ART. 13 DISPUTES

For any dispute the court of Mantua will have jurisdiction.

ART. 14 SPECIFICATIONS

The data in this document may be subject to change without notice in order to improve the product or correct any errors.
